

TOP 3 RISKS

FOR REMOTE WORKERS

TOP 3 RISKS FOR REMOTE WORKERS

1 Weak Passwords

RISK

One of the primary drivers for breaches on a global scale. Short or obvious passwords, as well as using the same password for multiple accounts, can make you vulnerable to hackers.

WHAT COULD HAPPEN?

A coworker alerted you of a suspicious message sent from your email account. After escalating the situation to your security team, they informed you that your email account had been compromised due to a weak password.

2 Social Engineering Attacks

RISK

Remote workers can be especially vulnerable to phishing or voice-based phone call attacks since they are often responsible for their own security.

WHAT COULD HAPPEN?

An urgent SMS text message appearing to come from HR requested confirmation of your bank account for direct deposit. After clicking the link and entering your information, you later received an overdraft notice and a suspicious activity alert from your bank. You notified HR and learned that they did not send the request, so you contacted the security team and your bank.

3 Outdated Systems/Software

RISK

Remote workers may not have access to a readily available in-house IT Team, automatic firmware, or patches, and may be working from older devices. A home wi-fi network may be less secure and can't be protected by the company at all times.

WHAT COULD HAPPEN?

Your supervisor notified you that company trade secrets were stolen from your work laptop and sold to competitors. An investigation revealed outdated software on your computer led to a vulnerability that allowed the hacker to gain access to this confidential data.

**Let us protect your firm from these threats
as you or your staff work remotely (or in the office) -
in only 66 minutes.**

BobaGuard is a turn-key suite that provides a layered security approach to greatly reduce your chances of getting hacked.

Grow your practice without worry using the proven protection system that drastically reduces cybercriminals' threats to your data (without having to spend your time figuring out the tech).
